1. Architecture — the funnel

Retainer pitch at kickoff (paid ads / social media)
--

The mockup is doing two jobs at once: it's the bait, and it's the proof of work. By the time a prospect is on the discovery call, they've already seen what their site could look like — the conversation is about scope, not capability.

2. Audience segmentation

Three tiers, each with a different message and offer ladder.

Tier	Description	Primary offer	Secondary offer
A. No website	Operating venue, Instagram-only, no domain	Digital Presence Starter (low-friction first)	Full build
B. Bad website	Outdated/DIY (Wix, old WordPress), slow, looks generic	Full build (rebuild)	Mockup as side-by-side comparison
C. Decent website, no traffic	Working site but no paid/organic strategy	Retainer (paid ads / social)	SEO audit

The list of ~150 venues should be pre-tagged A/B/C so messaging matches reality. The mockup hook works for A and B; for C, the audit is the better hook.

3. Channel strategy & creative inventory

3.1 Instagram DM (warmest)

- **Volume:** 10 outbound DMs/week per tier (A and B priority).
- **Opener:** Short, observational, references a real detail of the venue. Never copy-paste.
- **Asset:** A 30-second screen-recorded “mini-mockup” — homepage hero only, generated in Figma in 15 minutes. Sent as a DM video to qualifying responses.
- **Goal:** Move conversation to WhatsApp.

3.2 WhatsApp outreach

- **Trigger:** Inbound from any other channel, or warm referrals.
- **Asset:** Full mockup (3-4 sections) delivered as a Loom video walkthrough + figma link.
- **Goal:** Book the discovery call.

3.3 Meta ads (Facebook + Instagram)

- **Budget:** MUR 60K over 90 days (~MUR 660/day).
- **Targeting:** Mauritius, age 28-55, interests overlapping bar/restaurant ownership, hospitality, F&B operators. Lookalike from any owner-list seed if available.
- **Creative:** 3 ad sets:
 1. *Before/After* — outdated venue site → new La Gaudière mockup
 2. *Speed* — “Live in 2-3 days” countdown reel
 3. *Niche* — “Built for Mauritian bars & lounges” with venue-style imagery
- **CTA:** “Send your Instagram → free mockup in 24 hours” → WhatsApp deep link.

3.4 In-person scouting

- **Cadence:** One evening per week. Owner visits 3–4 venues, observes, takes one photo of the front, follows the venue on Instagram the next morning. DM is sent later that week referencing the visit.
- **Why this works in Mauritius:** Small island, tight scene, owners notice when someone shows up.

3.5 Partnerships (light)

- Drink/spirit distributor reps already know every venue owner. Offer a small revenue share (10% of project fee) for warm introductions that close.
- Hospitality photographers — content trade.

4. Tools & integrations

Purpose	Tool	Notes
Lead tracking	Google Sheet (<code>_code/lead-tracker.xlsx</code>)	Columns: venue, tier A/B/C, channel, status, mockup link, call date, outcome
Mockup design	Figma	Master template — homepage, menu page, events page, link-in-bio
Mockup delivery	Loom + WhatsApp Business	Loom for walkthrough, WhatsApp for the link
Ads	Meta Ads Manager	One campaign, three ad sets per \$3.3
Calls	Google Calendar + Calendly	Calendly for self-booking from WhatsApp
Analytics	GA4 + UTM tags on all ad URLs	Tag mockup-request landing page distinctly
Source files	<code>_code/</code> folder (this project)	Ad creative, mockup template snapshots, lead tracker

5. Content & creative production list

Produced once during Phase 3 (Build), reused across the 90 days:

1. **Master Figma mockup template** — homepage, menu, events, gallery, link-in-bio. ~6 hours.
2. **Three ad creatives** (Before/After, Speed, Niche). Each: static + 15s reel.
3. **Mockup walkthrough script for Loom** — 90-second template, fill-in-the-blanks per venue.
4. **Discovery-call script** — 20 minutes, 5 sections (context, problem, mockup walk-through, scope, next step).
5. **One-pager PDF** sent after the call — pricing + delivery timeline + what's included.
6. **Retainer pitch deck** — used at kickoff, only if the venue is a fit.

6. Mockup production process

This is the load-bearing operation of the campaign. Process must be tight or it eats the founder's week.

1. Inbound request lands (WhatsApp / DM / Meta lead form).
2. **Qualify in 60 seconds:** is this a bar/lounge/restaurant-bar in Mauritius? Yes → continue. No → polite decline.
3. **Pull venue details:** Instagram handle, location, hero photo, drink/food specialty.
4. **Open Figma master template**, swap: logo, hero photo, brand colors (eyedrop from Instagram), three menu items, hours.

5. **Cap: 90 minutes per mockup.** If it's taking longer, the venue is too custom — quote a mockup-paid version instead.
6. **Loom walkthrough**, 60-90 seconds. Show three sections, end with the discovery-call CTA.
7. **Send via WhatsApp** with one line: *"Mockup ready — happy to walk you through it on a quick call. Free."*
8. **Log in tracker** with timestamp, channel, tier, link.

Volume cap: **5 mockups per week.** More than that and quality drops; fewer and the funnel underfeeds.

7. Sales motion — discovery call

20 minutes, 5 sections:

1. **0-3 min** — Context. What does the venue do, what's the slow night, what's the goal for the next 6 months?
2. **3-8 min** — Walk through the mockup live. Show how each section solves a stated problem.
3. **8-13 min** — Scope. Site map, content needs, integrations (reservations, menu sync).
4. **13-17 min** — Pricing + timeline. Offer either: full build (MUR 45K+, 2-3 days) or Digital Presence Starter (MUR 4-5K) as a paid pilot.
5. **17-20 min** — Next step. If full build: send proposal + invoice the same day. If Starter: collect domain decision and start within 48 hours. If neither: tag as nurture, send the one-pager, follow up in 30 days.

8. Tracking & metrics

Reviewed weekly, every Monday morning:

Metric	Source	Target (90d)
Outbound touches sent	Lead tracker	300
Mockup requests received	Lead tracker	60
Mockup-to-call conversion	Lead tracker	≥ 40%
Discovery calls held	Calendar	25
Call-to-Starter conversion	Lead tracker	≥ 35%
Call-to-build conversion	Lead tracker	≥ 20%
Cost per mockup request (paid only)	Meta + tracker	≤ MUR 1,000
Cost per signed build	Meta + tracker	≤ MUR 8,000

A weekly check-in note is added to the change log (03-Build-Changelog.md once Phase 3 starts).

9. Cadence — 90-day timeline

Week 1-2 PHASE 3 BUILD

- Master Figma template, ad creatives, Loom script, discovery script, lead tracker, pricing one-pager.
- Meta ads launched at end of Week 2.

Week 3-10 PHASE 4 RUN (the campaign itself)

- Daily: 2 outbound touches.
- Weekly: 1 scouting evening; mockup batch (max 5); Monday metrics review.
- Iterate ad creative every 14 days based on CTR.

Week 11 PHASE 5 DEPLOY (close-out)

- All open mockups followed up.

- All discovery calls held or rescheduled.
- Final proposals sent.

Week 12 PHASE 6 HYPERCARE / RETRO

- What worked, what didn't, channel ROI breakdown.
- Runbook produced for the next campaign cycle.

10. Budget

Line item	Amount (MUR)	Notes
Meta paid media	60,000	90 days, ~660/day
Calendly Pro (3mo)	1,500	
Loom Business (3mo)	1,800	
Stock photography / footage	5,000	Optional, only if needed
Partner referral pool	10,000	Held against closed referrals only
Buffer (10%)	7,800	
Total cash budget	~86,000	Excludes founder time

Founder time estimate: ~12 hrs/week × 12 weeks ≈ 144 hours.

11. Rollback plan

If at the **mid-point review (Week 6)** the campaign is failing:

Failure mode	Threshold	Action
Low mockup-request volume	< 20 by Week 6	Pause Meta ads. Triple outbound DMs. Add second weekly scouting evening.
High mockups, low calls	< 30% conversion	Tighten qualification before mockup. Shorten Loom walkthrough. Add stronger call CTA.
Calls held, none closing	0 builds + 0 Starters by Week 6	Re-examine pricing, switch lead offer to Starter only as a wedge.
Owner over capacity	> 18 hrs/week sustained	Cap mockups to 3/week. Suspend in-person scouting. Outsource ad management.

If the campaign is failing on multiple axes by Week 6: pause new outbound, finish open conversations, write the Hypercare retro early, recycle learnings into a tighter v2 in the next quarter.

12. Detailed risks & mitigations

Risk	Likelihood	Impact	Mitigation
Addressable market too small	Medium	High	Tier list strictly; reserve C-tier (retainer) prospects for next campaign

Risk	Likelihood	Impact	Mitigation
Mockup fatigue (collected, not converted)	Medium	Medium	Add 60s qualification step; cap mockups at 5/week
Founder bandwidth blow-out	High	High	Hard cap on mockups; one scouting night only; weekly Monday review
Seasonality / cool-season slowness	Medium	Medium	Lean angle into “get ready for summer high season”
Meta ads underperform Mauritius geo	Medium	Medium	Reallocate to outbound + scouting at Week 6 if CPM unsustainable
Word-of-mouth saturation (same operators talk)	Low	Medium	Rotate creative every 14 days; vary outbound openers
Delivery quality drop under volume	Medium	High	Pre-build Figma template library; refuse over-custom briefs

13. Dependencies

- Product Marketing Context document (Reference/Product-Marketing-Context.md) — voice, positioning, pricing, anti-personas. Source of truth for all copy.
- WhatsApp Business account active and verified.
- Meta Business Manager + ad account in good standing.
- Figma master file populated with at least one finished example before Week 2 ad launch.
- Founder availability for ≥ 12 hrs/week across 12 weeks.

14. Sign-off

Role	Name	Signature	Date
Project sponsor			
Campaign owner			
Reviewer			

Phase 2 closes when this doc is signed. Phase 3 (Build) does not start before sign-off.
